## **Guestrooms**

### **Technology**

ARIA boasts the most [technologically advanced guestrooms](#) in the country. Every guestroom features a level of personalized automation currently found only in high-end custom homes. Guestrooms are networked with fiber offering one gigabit of bandwidth for matchless Internet connectivity and guest service:

- Rooms and suites recognize guests' first time in the space and "greets" them as they enter: light fills the room, the curtains automatically part to showcase the spectacular city or mountain views, and the TV turns on to display a list of automated controls for personalization
- Preferences remembered every time guest is in-room
- One-touch control of lighting, room temperature, television/video systems, music, wake-up calls, draperies and requests for service through a single, easy-to-use remote control
- Guests can wake up gradually through controlled temperature, lighting, curtain opening and preferred music
- One button can modify all room settings at once; "Good Night" turns off lights, TV and/or music, shuts curtains and turns on privacy notification
- Keyless locks utilizing RFID technology reduce the failure of room keys
- Wireless Internet is up to eight times faster (128 kilobytes) than today's average U.S. hotel
- In-room devices automatically "communicate" maintenance needs; remote control batteries and light bulbs are replaced before guests notice a problem

### **Additional Features**

- Expansive floor-to-ceiling windows; corner-window views from every guest floor
- 42-inch LCD HDTV with 'smart panel' allowing guests to connect laptops, game consoles, cameras, MP3 players, etc.
